EDUCATION

- **SRM Institute of Technology** Chennai, India
Bachelor of Technology - Computer Science July 2024 - June 2028
Courses: Operating Systems, Data Structures, Analysis Of Algorithms, Artificial Intelligence, Machine Learning, Networking, Databases
- **Army Public School** Nashik, India
Class XII (CBSE) - Percentage: 85%
- **Army Public School** Janglot, India
Class X (CBSE) - Percentage: 88%

SKILLS SUMMARY

- **Languages:** Python, C++, JavaScript, SQL
- **Tools:** GIT, , MySQL, SQLite
- **Platforms:** Web, Windows, Arduino, AWS
- **Soft Skills:** Leadership, Event Management, Writing, Public Speaking, Time Management

EXPERIENCE

- **ACM SIGKDD Chapter** SRMIST
WEB DEV - Lead (Full-time) Sep 2025 - Present
 - **Responsibility:** Led the web development team in organizing hackathons, technical workshops, and coding events for 200+ students across the university.
 - **Hackathons:** Reviewed and evaluated project ideas, presentations, and technical proposals for club events and hackathon selections, ensuring innovation and technical feasibility.
 - **Mentoring:** IMentored junior developers by conducting hands-on sessions on modern web technologies, debugging practices, and collaborative development workflows .
- **IEEE Computer Society** SRMIST
Event Member (Part-time) Mar 2026 - Present
 - **Role:** Coordinated and managed multiple technical events including hackathons, workshops, and coding competitions with active participation from students across departments.
 - **Learning:** Contributed to the organization of an AI Expo by assisting in event planning, technical coordination, and participant engagement activities.
 - **Mentor:** Guided students in research and technical documentation by supporting paper writing, review processes, and publication-related activities. .

PROJECTS

- **Payment Portal Web Application (Flask, Python, MySQL, HTML, CSS, JavaScript):**
 - Developed a full-stack payment portal web application enabling secure user authentication, money transfers, transaction tracking, and account management functionalities.
 - Built RESTful backend services using Flask and integrated MySQL database for efficient handling of user data, transaction records, and payment operations.
 - Designed responsive frontend interfaces with dynamic dashboards, transfer modules, and transaction history pages using HTML, CSS, and JavaScript.
 - Implemented modular architecture with separate database connectors, authentication workflows, and reusable frontend components to improve maintainability and scalability.
- **AI-Powered Fake News Detection System (Python, Flask, Transformers, Hugging Face, JavaScript, HTML/CSS):**
 - Developed an end-to-end fake news detection web application leveraging a fine-tuned DistilRoBERTa transformer model for real-time NLP-based news classification.
 - Engineered scalable Flask REST APIs for model inference, prediction handling, and dynamic frontend-backend communication with optimized loading pipelines.
 - Integrated Hugging Face Transformers and PyTorch-based sequence classification models with automated model downloading, tokenization, and confidence-score prediction workflows.
 - Designed an interactive and responsive frontend with animated UI components, real-time analysis feedback, and random news simulation features to enhance user experience.

HONORS AND AWARDS

- Winner HACKRUSH 2.0 Hackathon - Sep, 2025
- Awarded for Top 5 Team in QwickInnovate , QDC SRMIST - Feb, 2026
